- The goals
- The tokenomics
- The reward system
- Our roadmap

About the token

"**CRYPTO** IS UNSTOPPABLE
CRYPTO IS THE **FUTURE**." - **CHARLES HOSKINSON**

The CHARLES token has a yield-generate contract on BSC (Binance Smart Chain) when the token holders get rewarded in ADA (BEP20). The mechanism incentivizes token holders to hold in order to earn dividends from the transactions.

About us

We - the adacoin.hu team - runs a small but dedicated Cardano community in Hungary. We've been in the Cardano scene since December of 2020, when the team has started a Cardano news portal. A few months later we built our own Cardano stake pool (ticker: GULAS) and the community had started to grow rapidly. Since then we're active on almost all major social platform.

In April, 2021 we applied for (and received!) the IOHK 's delegation programme, which means they support stake pool operators running single pools helping support the Cardano network and community.

Since the start we had a few more projects related to Cardano like a reward calculator website (<https://cardanostakepool.io>) or translating Yoroi to our native language.

ATTENTION! THIS PROJECT IS TOTALLY A COMMUNITY ORGANIZATION! WE ARE NOT CONNECTED WITH CARDANO FOUNDATION OR ANY OTHER GLOBAL CRYPTO COMPANY!

The goals

We would like to

- pay tribute to Charles Hoskinson, founder of Cardano, and offer an alternative way to earn ADA for Cardano stake pool delegators
- create a token on BSC that can be trusted and the liquidity not to be rug-pulled during overnight
- do good and give back to the community (supporting the holders/delegators)

Tokenomics

Buy transactions has an automatic 14%, while sell 18% transaction tax which is divided as follows:

1 Billion
Total supply

Buy

14%
fee

- 10% Reward
- 3% Marketing
- 1% Development

Sell

18%
fee

- 10% Reward
- 4% Marketing
- 3% Buyback
- 1% Development

The reward system

The Highlander effect:

At every transaction the hodlers are rewarded by ADA token. The amount of the reward depends on the number of Charles tokens that you keep in your diamond hands.

So it doesn't matter if you see a **red** or **green** colour in the chart, you will smile.

Our roadmap

The Beginning

Fair Token launch

Creation of socials

Website Launch

National marketing

300 Charles Holder

500 Telegram Members

Development Stages

Coingecko, CMC listing

International marketing

Paid advertisements

Social competitions

2500 Charles Holder

3000 Telegram Members

Growing Up

Bridge BSC to Cardano

Charles farming pool

Charles stakeing pool

Influencer marketing

Massiv advertising

6000 Charles Holder

5000 Telegram Members

More to be announced...
